SUBJ: Rate of Occidental's Oil Production

1. Industry sources have informed FSE that LARG agreed permit Occidental's oil production to be increased to 700,000 barrels per day (from current level of about 420,000 b/d) provided engineering study (yet to be made) determines that higher level would not damage oil fields (i.e. not diminish ultimate recoverable reserves.)

2. Can Embassy comment?

END.
